

# BitZyon

**An ERC20 token (Ethereum) aimed at  
tokenization of a digital asset**

**WhitePaper**

version 1.0

# ABSTRACT

In recent years, blockchain technology has been applied to several areas of business and is no longer an experimental field for some computer enthusiasts. cryptography. Blockchain is interesting for companies and there is a clear tendency for technology to become deeply embedded in many sectors. Blockchain technology allows startups to avoid bureaucracy and collect funds for the implementation of your ideas more quickly, launching initial coin offers.

BitZyon is the newest ERC20 token powered by the Ethereum blockchain, which aims to tokenize a digital asset, where the holders BitZyon tokens will be entitled to a 20% share of the supply BitZyon cryptocurrency, which will be implemented on the blockchain network in the near future.

## TOKEN ON THE BLOCKCHAIN

**Accessibility:** a blockchain allows precise control of who are token owners at every moment. Thus, it is possible to issue a large quantity of tokens at a low low value, reduction or access of the public investor.

**Divisible:** Tokens issued represent small portions of an asset.

**Efficient:** a blockchain allows the replacement of a series of intermediaries, reducing the final cost of the operation and reducing the investor return.

**Transparent:** All information related to assets is registered on the blockchain.

# SOLUTION DECLARATION

## Advantages of Tokenization

Imagine that you want to invest, but your initial investment is modest and you want to buy only part of the good. With the traditional market this is quite complicated to do. Through tokenization it is possible to buy a fraction of a good.

The tokenization process has advantages for both holders of assets, as well as token holders. For holders of assets, there is an increase in liquidity.

This is the process of using cryptographic digital tokens to represent ownership of a particular asset. A tokenized asset is a digital contract issued using blockchain technology and linked to a legal document that represents an asset. That is, the holder of the token holds the asset that that token represents.

Tokenization of real assets is the next step in pulverizing the blockchain usage. A big step, there is no doubt, essential to the diffusion of the system in more conservative sectors of the economy and will consequently, once and for all, establish the technology Blockchain, beyond cryptocurrencies.

# SPECIFICATIONS

## BitZyon Token

Token full name	BitZyon
Symbol of the token	ZYON
Platform	Ethereum(ERC20)
Number of decimal places	8
Token contract address	0x5d9b9f6eeaeabc46fdfa0c1041e929834b15c03a
Total issue volume	300.000.000
Explorer	<a href="https://etherscan.io/token/0x5d9b9f6eeaeabc46fdfa0c1041e929834b15c03a">https://etherscan.io/token/0x5d9b9f6eeaeabc46fdfa0c1041e929834b15c03a</a>

### Token distribution

For Pre-Sale	20%	(60.000.000 BitZyon)
For Developers	6,67%	(20.000.000 BitZyon)
For Marketing Actions	3%	( 9.000.000 BitZyon)

Number of non-circulated tokens	70,33% (211.000.000 BitZyon)
---------------------------------	------------------------------

# PRE SALE

## BitZyon Token

The pre-sale phase is an opportunity to purchase the token in first hand. The initial offer will be made as follows and with the goals:

### 1st Round:

40 million tokens will be put up for sale for the value of 4 BTC satoshis for 1 BitZyon token.

From this first round of pre-sale, part of the amount will be allocated to listing on the Exchange Crex24.

The remaining amount of the balance will be used to boost marketing, search for future markets for exchange, improvements in infrastructure and operating costs.

### 2nd Round:

20 million tokens will be put up for sale for 5 BTC satoshis for 1 BitZyon token.

The value of this pre-sale round will be destined to boost marketing campaigns, search for future markets for exchange, infrastructure improvements and operating costs.

Altogether, in the initial offer, 60 million euros will be made available to the market BitZyon tokens.

# MARKETS

After the initial offer closes, the BitZyon token will be launched on the Exchange Crex24. Part of the amount collected in the pre-sale will be used to search for new Exchanges for future listings.

# PARTNERSHIPS

The team of developers will always be up to date with trends the crypto market, studying, and seeking to create solutions and alternatives with the objective of enhancing and further promoting the project BitZyon, giving greater liquidity and value, and the search for sponsorships and partnerships are on the list of these actions.

# SPECIFICATIONS

## BitZyon cryptocurrency (to be created)

Two years after the launch of the BitZyon token, the holders of the tokens will be entitled to a 20% share of the total supply of 100 million of the BitZyon cryptocurrency that will be implemented on the blockchain in the future next.

Bitzyon tokens can be exchanged for BitZyon cryptocurrencies on proportion that does not exceed 20% of the total supply of the currency to be launched.

At the time of this exchange, the total tokens in circulation, calculated in proportion to what each token holder It has.

So whoever has a BitZyon token can have the Bitzyon cryptocurrency, which will have an initial circulating supply of 20%, that is, 20 million.

*Cryptocurrency name: BitZyon*

*Cryptocurrency symbol: ZYON*

*POS: Proof of Stake (staking)*

*Total Supply: 100,000,000*

*Pre Sale: No*

## CONCLUSION

Tokenization allows organizations, companies and individuals tokenize financial assets and instruments. This is probably will show a powerful and predominantly used method in commerce and exchange.

In practice, tokenization removes barriers of difficulty and allows financial products are created and negotiated more easily, in faster and cheaper using blockchain.

All tokens in circulation will be transformed into cryptocurrency BitZyon, so the asset will have more features, and a higher value aggregate.
